DETAILED ACTION

1. This Office Action is in response to the Amendment filed January 3, 2003.

Claims 1-10 and 50-51 are canceled.

Claims 11-49 and 52-56 are pending.

Election/Restrictions

2. Applicant's election with traverse of Group I, claims 1-40 in Paper No. 10 is acknowledged. The traversal is on the ground(s) that Group I and Group II should be examined together. This is not found persuasive because the inventions of Group I and Group II have acquired a separate status within the art having different classifications and it would provide an undue examining burden upon the Examiner.

The requirement is still deemed proper and is therefore made FINAL.

Claims 41-49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 10.

New claim 56 is a linking claim between Group I and Group II.

3. Regarding claims 11-40 and 52-55, this application contains claims directed to the following patentably distinct species of the claimed invention: Species I, a method of fabricating a single ceramic film by repeating the steps. Species II, a method of fabricating a first and a second ceramic films having different crystal structures. Species

Art Unit: 2822

III, a method of selectively forming a ceramic film and crystallizing the film using an electromagnetic wave.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 23 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

CONCLUSION

Claim Objections

4. Claims 35-40 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 35-40 are dependent from the canceled claims 1 and 3.
